ROOT SYSTEM

techo®
ROYAL AHREND COMPANY

In interiors a key role is played by the selection of **high-quality natural materials**, good layout, ergonomics, pleasant and functional lighting, acoustic comfort, live plants and anything else that makes us feel good. We are offering contact with nature. Thanks to its solid ash-wood base, Root adds a feeling of luxury to any interior in which it is placed. It is suitable for offices, cafes, function rooms, reception

areas and meeting rooms. It is also suitable for use in the home. Its options for variability are almost endless. Coffee tables are available in two heights and sizes that can be combined with low seating or higher chairs. The system also offers storage space, so it is possible to tailor the interior furnishings from a combination of individual products. This furniture can create a comfortable atmosphere in any interior. Changing the table-top décor adds a further “dimension” – the visual one.

The Root range of tables are available with several practical accessories – hooks for bags, and cable channels that keep cables off the table top providing more and unhindered workspace. We also offer a range of low seating with matching bases. An interior will gain design value from a uniformity in the furnishings.
